

## THE U. S. CONSTITUTION: Was it really written to be “disposable”?

Unless you are living under a rock, you’ve noticed that our “rights and freedoms” seem to be dwindling away to pretty-much nothing in this nation. But why is that? Why does it seem like the powers-to-be are ignoring our “un-alienable rights” at every turn anymore? And why is it that the Constitution doesn’t seem to have the firepower that it once seemed to have?

For many of us who have been following this looming darkness to some extent, it was beginning to look like nothing would stop this runaway train of evil, and it has been puzzling as to why they are so confidently snubbing their noses at our Constitutional assurances lately. Is there something more terribly wrong with our system of law and governance than we had even first thought?

Well, by the Grace of God, some of us have been shown the heart of the problem, and it may sound hard to believe (and even harder yet to grasp once you do hear it) but the Constitution’s framers were not the “*great men of noble cause*” as we were taught in school. In fact, it’s clear to us now that they had a more sinister ulterior motive for why they wrote what they did in our nation’s most famous document!

Once you have seen what we have found, your jaw may drop, and you may go into denial, but the truth is so simple that it also has a simple solution to it as well. So, to try and get the word out on what we have found as quickly as we can in the hopes to get this over with as soon and painlessly as possible, we have assembled it all on a website to help explain what is really going on in these deeper layers, and for those of you who are already up to speed with the truth of 9/11, the truth about the federal reserve, etc, then the most elusive but important layer is perhaps what you have yet to hear: ***Our U.S. Constitution was written to be disposable!*** This is why we are now feeling the effects of the first stage of this tyranny where many judges and courts are ignoring our rights in various legal and political struggles as of late. But the good news is that we are finding out about their deep dark secret, long before they had expected us to, and we have even been showing folks the amazingly simple solution to this dilemma at the same time!

If you have been given a DVD of the video “***Hidden Faith of the Founding Fathers***” along with this handout, then please watch it (as it will be a base for what we will show you later) and learn the deeper recesses of the truths that we were not told in our history books about our founding father “heroes”. (If you did not get a DVD, the video can also be seen in its entirety at our website under the subject heading: “***Freemasonry: Hidden Satanism***”, and is the first video on that page.)

Once you have watched that, you will undoubtedly want to know more, where you could then jump over to the **audio** section and listen to the “***Ted Weiland Constitution audio series***”, that will shock you as to why there is no enforcement power behind the Constitution for us and you’ll see through common sense how they wrote each and every line to then seductively lure successive generations into a state of prosperous complacency where this “We the People” document is now sadly all but useless to us today by the very way that it was so deceitfully worded. Yet this comes as we also suddenly understand the serious evils of “Freemasonry” and why so many of them were on the writing staff of the Constitution (by design of the banking elite of Britain, Rome, etc.). It’s an amazing story showing the real war, far behind the curtains of the news media puppet show.

Feel free to email us via the “**contact us**” window on the home page for more information, or for free DVD copies of some of these videos, etc. The sooner we all know just what these cold-blooded control-freaks are doing, the sooner we can turn the tables on them, doing so under the less-complicated way that the wiser Puritans had originally set up for us against such tyranny.
